

Interpreter Video Monitors

Fixed tilt angle monitors

Interpreter Video Monitors are fixed built-in displays specially designed to support users with video contents when there is also a need to have a good view of the room. They offer a fixed tilt angle which is conceived to offer the best ergonomics, providing a direct line of vision straight to the action. The reduced height of the monitors allows to see each other while using the screen, making it easier to develop a smooth, collaborative and participative meeting when working together.

Interpreter Video Monitors are ideal to be integrated in meeting and conference rooms and interpreter booths, where space gets fully optimised with this unobtrusive solution.

PRODUCT FEATURES

REDUCED HEIGHT ALLOWING A WIDE VISION

34° FIXED TILT

EXTREMELY EASY INSTALLATION

RELIABLE AND DURABLE SOLUTION

HDCP COMPLIANT

A BOOST TO THE ROOM

- The built-in design opens up the vision field
- The Full HD resolution offers a perfect video resolution
- General visibility and focus points are strongly enhanced
- Alternative video contents can be analysed together with the room view

ROBUST & ERGONOMIC

Interpreter Video Monitors integrate the most advanced technology and a first level Full HD screen, assuring a high quality product combining utility and durability. They are made of powder coated steel, resulting in a robust housing with a resistant finish that contributes to the long life of the equipment.

Interpreter monitors also offer great ergonomics to the user. Their 34° fixed tilt is an optimal viewing angle to work both watching the whole room and analysing data or presentations on the screen. As they are built-in into the table surface, space is optimised to the maximum and the visual field remains wide open to users.

The monitors are very easy and simple to install, assuring a quick and trouble-free integration in the furniture.

HDCP COMPLIANT

Interpreter monitors include the most usual connection systems to ensure a total compatibility to admit all types of video contents. 1 x DVI-I and 1 x DVI-D inputs guarantee the display of analogue and digital video sources and the Albiral's HDCP licensed monitor manufacturer qualification certify protected high definition contents.

TS22010	The touch screen offers an interactive tool to select the desired options in a quick and direct way.
RS-232	Interpreter monitors can also integrate the RS-232 protocol, a system to set-up, control and diagnose the display remotely.
OOB	A special button for turn on/off functions can be integrated on the cover plate, allowing a fast start of the unit at just the push of a button.
SSB	A special button to select the source to display on screen can also be integrated on the cover plate, creating an easy path to view the desired contents.

PRODUCT SPECIFICATIONS

SCREEN	
Size	21.5" Full HD TFT Active Matrix LED Backlight
Resolution	1920 (h) x 1080 (v)
Brightness	350 cd/m ²
Contrast ratio	1000:1
Pixels	0.24795(h) x 0.24795(v) mm
Viewing angle	89°/89° (u/d) - 89°/89°(l/r)
Viewing area	476.064(h) x 267.786(v) mm
LED backlight lifespan	50,000 hrs
Response time	Tr 12 ms, Tf 10 ms
Temperature	Operating 0°C / +50°C Storage -20°C / +60°C

CONNECTIONS	
Input signal	DVI-I (1 input). HDCP compliant
	DVI-D (1 input). HDCP compliant
ELECTRICITY	
External power supply	100-240Vac, 47/63Hz, 12Vdc
Power consumption	60W
