

TabLift

Retractable motorised mount for tablets

The Tablift is a retractable motorised holder for tablets that has been designed for desk integration: a motorised docking station with optional powering. It allows to hide a tablet within the furniture thanks to a silent and harmonic motorised movement that discreetly conceals it when not in use. The rise and retraction movements are activated via push buttons located on the brushed stainless steel cover plate, RS-422, GPI contact closure or the app AHlink. The tablet rises and tilts in an angle of 20° and it can be manually rotated from 0 to 90° allowing it to be placed both vertically or horizontally and the fixing mechanism ensures its steady position.

Optionally, the system is available with an embedded power connector from each tablet manufacturer.

PRODUCT FEATURES

MOTORISED HOLDER FOR TABLETS

AUTOMATIC 20° TILT

REVOLVING MECHANISM FOR LANDSCAPE AND PORTRAIT POSITIONS

BRUSHED STAINLESS STEEL PASSIVE COVER PLATE

INTERACTIVE SETUP DISPLAY FOR ADDRESS SETUP, CONFIGURATION AND DIAGNOSE

SERIAL CONTROL AND REMOTE DIAGNOSE
